KÖSTER

KÖSTER TPO TF

For Tunnels and Foundations

Seams welded secure waterproofing seal

With signal layer for damage control

Resistant to roots perforation and permanent water contact

Superior durability and lasting performance

MADE IN GERMANY

// For all underground construction methods

- In situ retaining walls
- Secant pile and contiguous bored pile walls
- Prefab concrete panels
- Diaphragm walls

The KÖSTER TPO TF membranes are characterized by their high elongation and tear resistance properties.

- 1 KÖSTER SD Protection and Drainage Sheet
- 2 KÖSTER TPO TF-Membrane

// Advantages of KÖSTER TPO TF

-  Signal layer for damage control
-  Seams homogeneously welded (not glued)
-  Immediate waterproofing
-  Free of volatile plasticizers
-  High mechanical impact resistance
-  No chemical activation of the seam needed
-  Fast and clean installation

// KÖSTER TPO TF membrane range

Product name	Thickness	Length
KÖSTER TPO TF 1.5	1.5 mm	20 m
KÖSTER TPO TF 2.0	2.0 mm	20 m

// The product

The KÖSTER TPO TF is a reinforced waterproofing membrane with a silver signal layer on the top layer, produced in Germany with the highest quality compounds.

This robust waterproofing membrane is conformed to DIN EN 13967:2012 and a moisture barrier Type T. It is specially suitable for the waterproofing of tunnels and all types of underground structures.

Fields of application:

- Artificial or natural tunnels
- Rafts or mat foundations
- Retaining walls (positive side)
- Contiguous piling & diaphragm walls
- Embankment
