# KÖSTER CT 215 Universal Floor

Issued: 08/2020

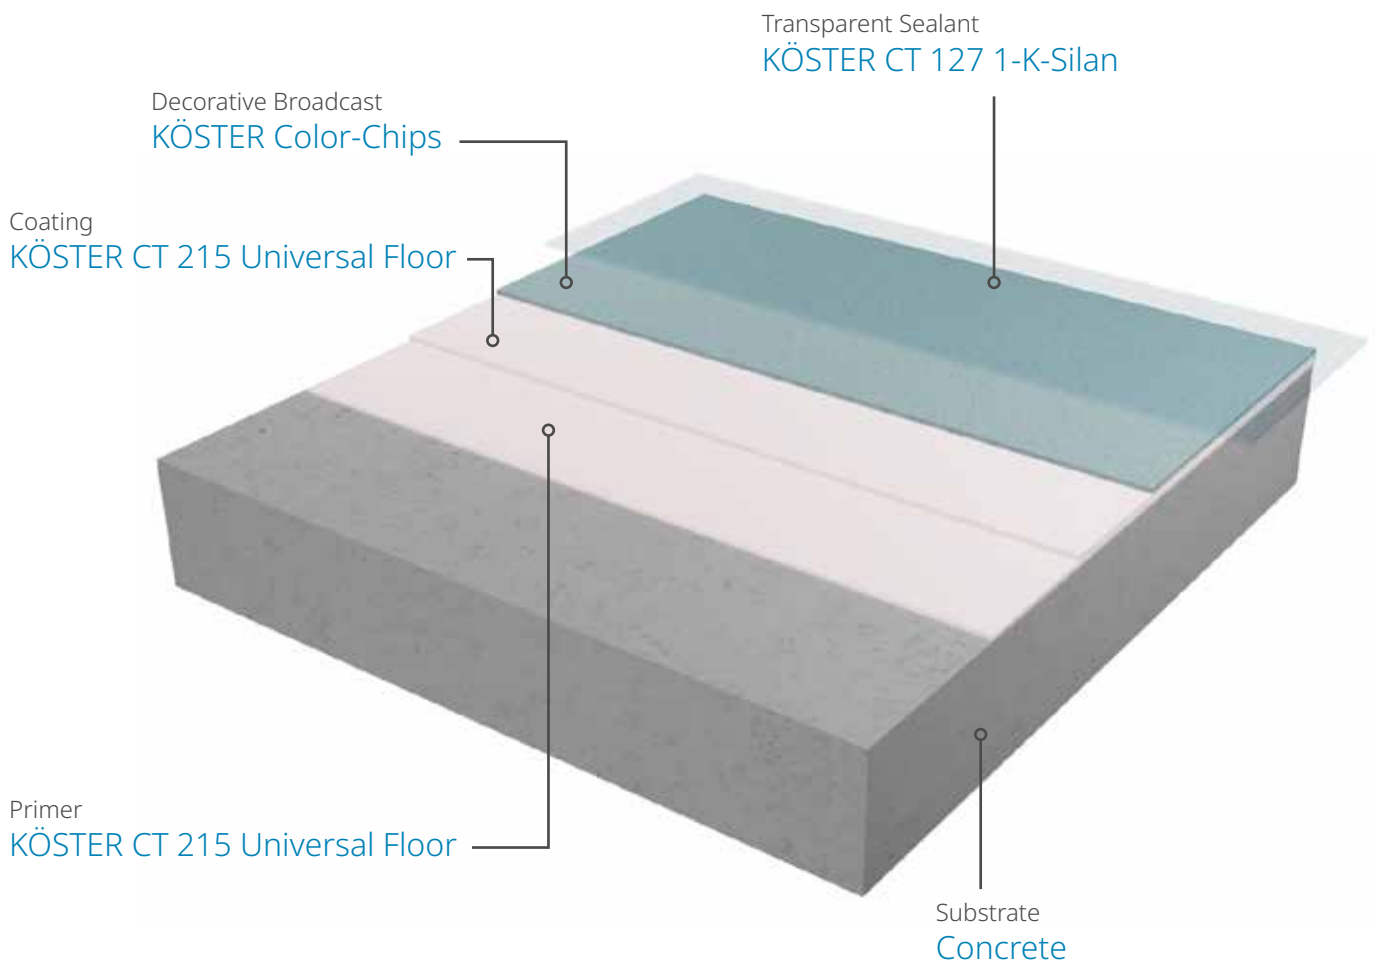

## KÖSTER CT 215 Universal Floor

Colored primer, coating and sealing system for light to medium mechanical loads in one product. Open to water vapor diffusion.

### Properties

- Water vapor permeable, therefore suitable for damp surfaces
- Can be filled with a special filler to achieve higher layer thicknesses
- High abrasion resistance
- Versatile
- Tested slip resistance
- Layer thicknesses of 0.2 – 2.0 mm possible
- Decorative design with almost all shades and broadcast with KÖSTER Color-Chips and colored quartz sands

### System build-up

## Coating types

### KÖSTER CT 215 Universal Floor

#### Fields of application

- Production areas
- Storage areas
- Trafficked paths
- Sales areas
- Garages
- Balconies and Terraces

#### Coatings

are an inexpensive way to protect floors and achieve good cleanability. For this the layer thickness is up to 0.5 mm. Sealing with **KÖSTER CT 215 Universal Floor** follows the surface structure of the surface. Surface roughness is only slightly compensated for. By adding **KÖSTER Anti-slip Granulate 20**, a non-slip floor is achieved.

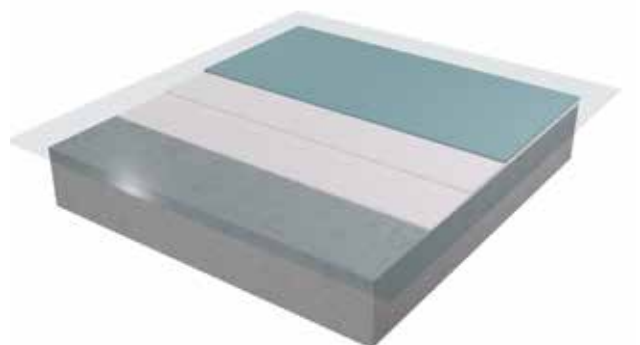

#### Flowable Coatings

compensate for minor irregularities in the surface. Due to the even distribution of the material, **KÖSTER CT 215 Universal Floor** flows in so that a smooth surface is created. With the addition of the additive **KÖSTER Filler Fine**, layer thicknesses of up to 2.0 mm can be achieved.

#### Decorative broadcast

can be used as an inexpensive sealer and **KÖSTER Color Chips** with flowable coatings in many different colors. Additional UV-stable, non-slip, transparent overcoats can be made from **KÖSTER CT 127 1C Silane** depending on the loading conditions.

We are there for you – worldwide.
